**Attention: Dr. Brain H.Y. Chung**

Dear Brian

It is excited that you plan to start a training program in Clinical Genetics in Hong Kong. Through our intense interaction over the past few years, I am convinced that you are qualified to conduct the training program. There are a good number of well-trained and engaged geneticists. Clinical Genetics practices in Hong Kong are of high quality and up to date.

I reviewed your proposal for the training program. It is very comprehensive with clearly stated aims and methods, covering widely about teaching, practicing, and research. The only comment that I can give is for Biochemical Genetics. Geneticists need to take care of patients with inborn errors of metabolism. Therefore, besides knowledge in Biochemical Genetics, Geneticists need to interact with other specialist and intensive care doctors to conduct patient care.

I strongly support your application, and wish its approval soon.

Yours

Wuh-Liang Hwu (Paul), M.D., Ph.D.
