

Hong Kong College of Paediatricians
Developmental-Behavioural Paediatrics Subspecialty Training Programme
Information for Application

Subspecialty Description

Developmental-Behavioural Paediatrics (DBP) is a discipline of Paediatrics that deals with the evaluation, treatment and management of children with or at risk for developmental, learning, emotional and behavioural problems, through an understanding of the underlying biological and social factors, and delivered in context of the children's lives and families. It emphasizes evidence based practice, multidisciplinary and cross sector collaboration, and aims to promote the optimal development and behavioural health of all children.

Commencement of programme

This invitation is for the training programme commencing from 1st July 2014. Invitations for training will normally be issued in January and July, subject to availability of trainers and clinical rotations.

Eligibility
