香港兒科醫學院

Date: 9th February 2015

Call for Application of First Fellows of the Subspecialty of Paediatric Respiratory Medicine (PRM)

To All Fellows of Hong Kong College of Paediatricians

Please read this IMPORTANT announcement about the Accreditation of the Subspecialty of **Paediatric Respiratory Medicine (PRM)**, and the call for application of FIRST FELLOW.

The Hong Kong College of Paediatricians recognized the importance of developing various subspecialties to streamline tertiary and quaternary paediatric practice and to prepare for the establishment of Hong Kong Children's Hospital. Through the effort of the Working Group for the Accreditation of Paediatric Subspecialties in Hong Kong, the College has established a fair and open mechanism for accreditation of subspecialties.

The College has received an application for the accreditation of the PRM subspecialty in late 2013. After a period of open consultation to all Fellows and careful consideration by the Committee for Subspecialty Boards, several revisions of the proposed PRM Subspecialty Programme were made. Now the Committee has recommended and College Council has agreed to start the formal process of accreditation. Fellows can access the full set of PRM accreditation documents on College Website – Subspecialty Section.

The whole process will be stringent and subject to scrutiny by an independent overseas expert in the field and the Hong Kong Academy of Medicine. It will result in the setting up of the relevant Subspecialty Board, training and accreditation guidelines, training programmes with accredited training centres and trainers. Future trainees will have to go through such a training programme before being recognized as a subspecialist. For name of subspecialist qualifications and quotability of such qualifications, you are invited to read the attached Appendix 1 on “Frequently asked questions on quotability of First Fellow of a Subspecialty”. Colleagues who are interested to apply for First Fellows are advised to read Appendix 2 on “Administrative principles for the admission of First Fellows to a new Subspecialty”.

To start the accreditation process, the College would like to call for applications from all Fellows interested in being accredited as First Fellows in the PRM Subspecialty. According to the Guideline of Hong Kong Academy of Medicine, and as shown in Appendix 2 on “Administrative principles for the admission of First Fellows”, College will cease admitting First Fellows after the “cutoff date” (i.e. the date when the formal Training Programme starts). The Subspecialty Board will decide the date of starting the formal Training Programme within 24 months of formal approval of the Subspecialty by the Academy. We estimate that the cutoff date for PRM Subspecialty will be about 2 years after the deadline stated below. Fellows who consider themselves eligible for First Fellows admission within this time frame should also respond to this Call, if they wish to be considered for admission. **Because the accreditation process involves inviting an External Assessor to Hong Kong to conduct the Interview Assessment, no application after the deadline stated below will be accepted. There will NOT be another Call for Application in future.**

The First Fellows Application Form is attached. To enable financial viability of the Subspecialty, the College has decided to levy a First Fellows Application Fee of \$3000 for each application. A further First Fellows Admission Fee of \$7000 is applicable for each successful application and admission of First Fellow in the Subspecialty.

Interested Fellows please submit the following to the College Honorary Secretary at Room 801, Hong Kong Academy of Medicine Jockey Club Building, Wong Chuk Hang Road, Hong Kong *on or before 19th April, 2015*:

1. The First Fellows Application Form (which should be duly signed);
2. Documentary evidence of your supervised training (please give reason if not available);
3. A brief curriculum vitae highlighting your relevant subspecialty experience; and
4. A cheque of \$ 3000 (payable to “Hong Kong College of Paediatricians”).

If you are interested to know more about the process of subspecialty accreditation, please contact the College secretariat at enquiry@paediatrician.org.hk for more information.

Dr Chan Chok Wan
Director of Subspecialty Boards

Frequently Asked Questions on Quotability of First Fellow of a Subspecialty

Frequently encountered questions	Latest reply by HKAM in Oct 2010:
If our Fellow has completed training in both General Paediatrics and a paediatric subspecialty e.g. paediatric cardiology:	
1. At the level of Specialist Registry, he/she can choose to be included in either the register of Specialist in Paediatrics or Specialist in Paediatric Cardiology, but not both. Is this true?	<i>Correct</i>
2. He/she can change between the two registries at any time. How often can he/she change registries?	<i>Any doctor can apply to MCHK to change specialty in Specialist Registry, but he would need to be removed from the registered specialty first before he can be entered for a new specialty. I am not aware of any time restriction. But it normally takes a few months for the process, as MCHK would need to check with HKAM whether the Fellow/doctor is eligible for the specialty being applied (we have to go through HKAM Council), then MCHK has to go through the EAC and MCHK main Council.</i>
3. At the Academy Fellowship level, he/she will only be awarded one Academy Fellowship – i.e. FHKAM(Paediatrics). Is this true?	<i>Correct. At the Academy, we only have 15 types of Fellowship.</i>
4. Will the Academy award double Academy Fellowships e.g. FHKAM(Paediatrics) and FHKAM(Paediatric Cardiology)?	<i>No. Double Fellowship is possible only for “cross-college” Fellowship, as mentioned above we only have 15 Fellowship at the Academy level – one for each College.</i>
5. At the College Fellowship level, can the College award double Fellowships to this Fellow – i.e. both FHKCPaed and FHKCPaed (Paediatric Cardiology)?	<i>It is up to your College to decide, as long as your constitutions allow it. Additional comments: Before a new specialty can be included in SR, the specialty must be approved by the Academy EC. After HKAM Council endorsed the new specialty, Academy would write to MCHK to recommend including the new specialty in the SR.</i>

The College has recommended the term “Board Certified in [Subspecialty]” for newly accredited Fellows in the Subspecialty. Is this title quotable?

The quotability of a professional qualification is decided by the Medical Council of Hong Kong, basing on 1) at least 6 months of full time structured and supervised training or study; and 2) formal assessment by a recognized medical body or independently vetted (e.g. external examiner) by a recognized medical body. It is unlikely that a First Fellow can quote this title because he/she did not undergo an examination to get such a degree. However, College may apply for quotability for future graduates who have undergone the formal training programme and Board examination.

Document 8 newly revised January 2015**Hong Kong College of Paediatricians****Administrative Principles for the admission of First Fellows to the Subspecialty of Paediatric Respiratory Medicine (PRM)**

1. Application for First Fellows will be opened on receiving the proposal of establishment of the PRM subspecialty. All potential candidates are kept informed of the progress of accreditation. First Fellows will be admitted only after approval of the Subspecialty by the Hong Kong Academy of Medicine (HKAM).
2. The College will cease to admit First Fellows once the PRM subspecialty Training Programme starts (the cut-off date), which should be no later than 24 months from the date of approval of the PRM subspecialty by the HKAM.
3. All First Fellows must have Fellowship of FHKAM(Paediatrics) AND FHKCPaed.
4. All First Fellows must have the following subspecialty training:
EITHER
 - 4.1. He/she has undergone supervised training in PRM for 3 years in an overseas centre recognised for PRM training by the professional college/authority in that country;
OR
 - 4.2. He/she has *a period of full-time supervised training (which should normally be not less than 6 months) in a recognized centre.* In addition, the shortfall of the 3 years of the stipulated accredited subspecialty training programme should be *made up with a period of Good Independent Practice (GIP) in that subspecialty* of twice of the shortfall duration required to complete the 3 years accredited training programme.
5. To fulfil the criteria of “supervised training” in section 4.2, the period should satisfy ALL of the followings:
 - 5.1. Training in all areas listed as mandatory modules in the PRM subspecialty curriculum can be counted towards the 6 months “supervised training”. However, the PRM subspecialty core curriculum must account for a majority of the claimed “supervised training” period. Thus if an applicant claims the minimum of 6 months of “supervised training”, training in PRM core curriculum should be more than 3 months. Training in other mandatory modules can be counted to a maximum equal to the duration of the mandatory modules in the future training programme, but limited to less than half of total claimed supervised training.
 - 5.2. A recognized centre is defined as either an overseas centre recognized or accredited for training in PRM by the professional college/authority in that country; or a local centre that is a fully accredited training centre of the PRM subspecialty Training Programme.
 - 5.3. For local centres, the candidate must prove that he/she is serving full time in the Subspecialty Team in that centre.
 - 5.4. The maximum period of supervised training recognized for local centers will be 6 months.

6. To fulfil the criteria of “Good Independent Practice (GIP)” in section 4.2, the period should satisfy sections 6.1 and 6.2.:

6.1. The assurance of the standard and quality of the GIP in PRM should be supported by documentation of the following activities during the claimed period:

- the clinical workload in PRM (cases managed, procedures performed), and workload in Spirometry and Bronchoscopy. For those potential First Fellows whose subspecialty training was completed before 31 December 2005, when the first Bronchoscopy Course was organized in Hong Kong, a remedial course on bronchoscopy with an assessment will be organized by the Provisional Sub-specialty Board for them. Passing the assessment at the end of the course will render them eligible to apply to become First Fellows; AND
- relevant educational activities, such as conferences participated; AND
- relevant research and publications; AND
- participation in relevant professional bodies; AND
- teaching in the relevant fields

Note:

- a) The period of GIP will be counted from the time an applicant is eligible to obtain the Fellowship of the Hong Kong College of Paediatricians (count from the month after passing Exit Assessment to the month before the First Fellow Interview Assessment).
 - b) One cannot claim GIP in more than one Subspecialty simultaneously during any one period.
 - c) One can claim GIP in different Subspecialties in sequential periods of one’s career. Implications are that one can be First Fellows in more than one subspecialty if one has adequate separate supervised training/GIP in the subspecialties.
 - d) College should be satisfied of a First Fellow’s competency at the time of admission. Therefore the applicant should be in active practice in the subspecialty (as determined by the Assessment Committee) up to the time of application for First Fellow accreditation.
 - e) The GIP is not restricted to practice within accredited institutions. However, a significant proportion of his/her practice should be in the subspecialty. The nature and amount of practice qualifying for GIP will be determined by the Assessment Committee.
 - f) GIP period will be counted up to three months before the cut-off date. The Assessment Committee takes approximately 3 months for completing the endorsement procedures of admission of a First Fellow by the College and then the HK Academy of Medicine.
7. All First Fellows will have to pass an assessment by the College. The assessment shall be based on criteria comparable to that required for Fellowship in the new subspecialty obtained via the approved formal training programme. The assessment will be conducted by the Assessment Committee of the Hong Kong College of Paediatricians in conjunction with an External Assessor appointed by the College.
8. For those Fellows who have acquired substantial subspecialty experience but who have not met the Admission Criteria as stated in paragraph 4 above at the cut-off date, there is a special

one-off arrangement for them to become Fellows in the new subspecialty provided they have fulfilled all of the following conditions, namely that they:-

- a) have already fulfilled *at least 75%* of the requirement as stated in paragraph 4.1 or 4.2 above, whether in terms of the duration of good independent practice and experience required by the College, at the cut-off date as stated in paragraph 2;
 - b) have registered with the College on or before the cut-off date of their intention to follow this special one-off arrangement;
 - c) will undergo a supervised training programme, in College accredited training centres, to make up for the shortage of period of “supervised training” or “good independent practice” requirements as stated in paragraph 4.1 or 4.2 above. All make-up programmes must be completed before the First Exit Examination takes place.
 - d) have to pass the normal Exit Examination of the subspecialty.
- College will submit a list of these College Fellows to the Academy within 1 month after the cut-off date. The provisions under this one-off arrangement cease to be in force once the Exit Examination of the subspecialty has been in place.

Prepared by PRM Group and Committee for Subspecialty Board on 29 Jan 2015
